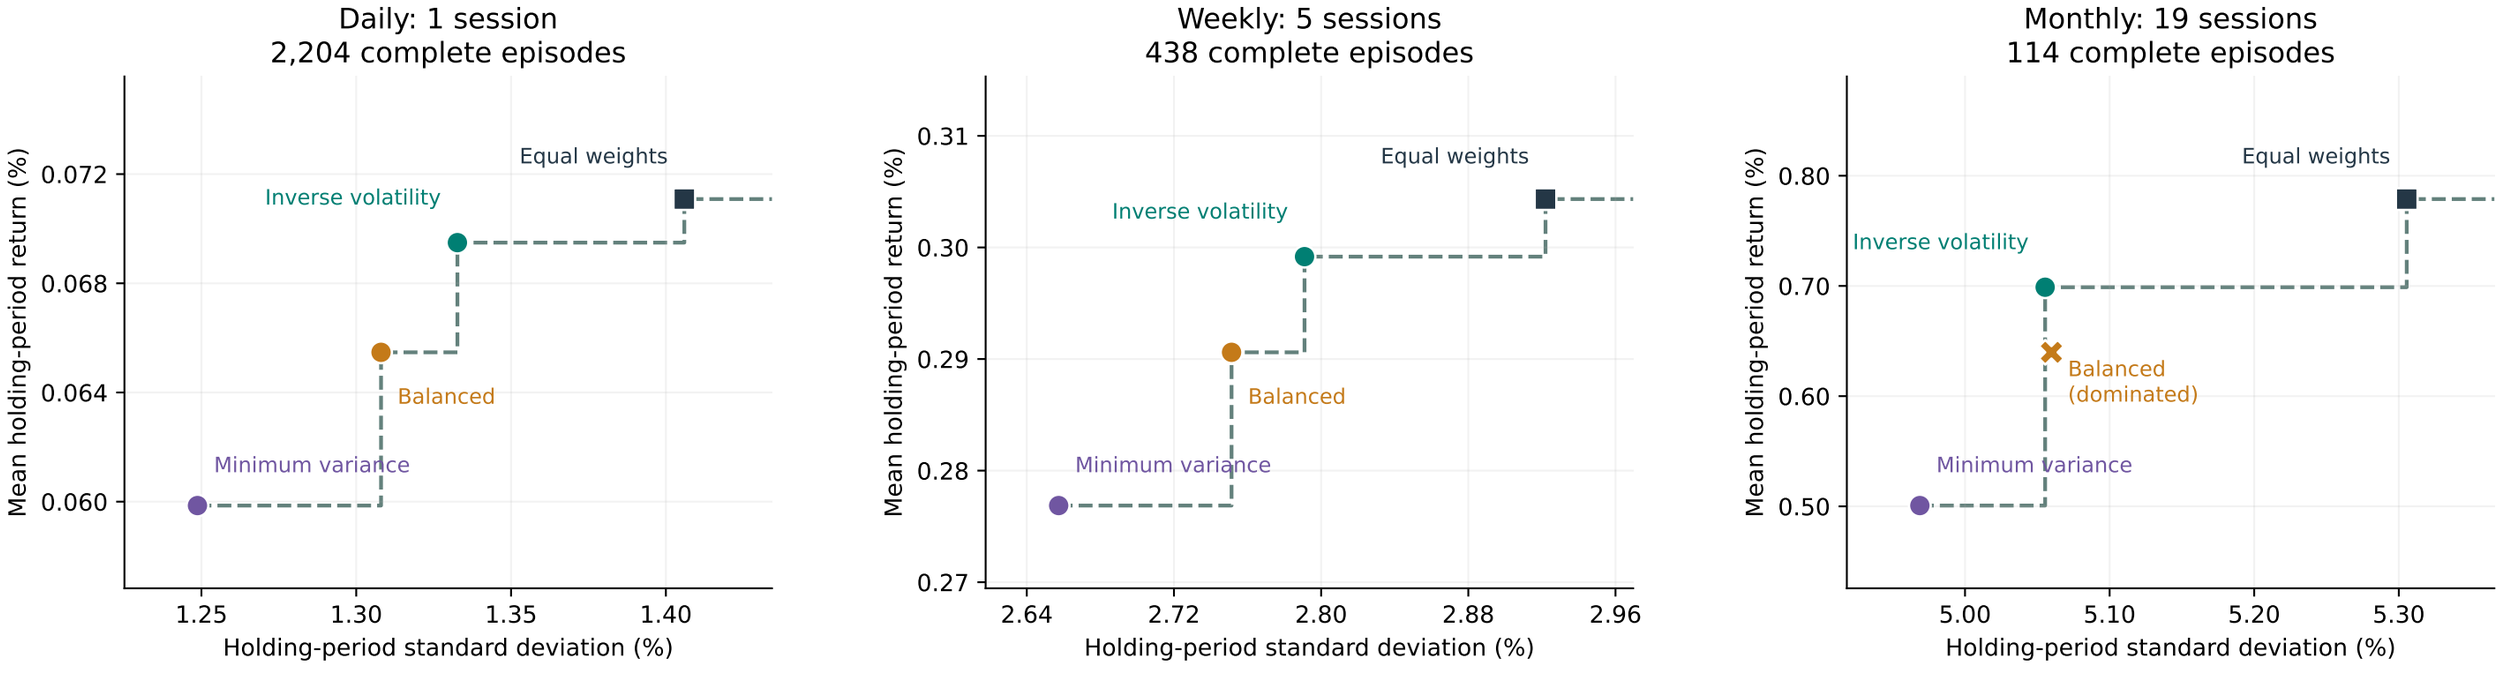
Historical Pareto frontier among four tested allocations

2018-01-02 to 2026-10-21 | Same five stock selections and execution dates | Zero-cost nominal price returns



Efficient tested allocation
Dominated tested allocation
Current equal-weight allocation
Best tested return within a volatility limit

Lower volatility is left; higher return is up. Only markers are tested portfolios; the steps are a volatility-budget envelope.
Historical point estimates with sampling uncertainty. Separate horizon scales. Dividends excluded. No new strategy is fitted or selected.
